Software Engineer Student

To

Belgium Campus Partner

1 July 2020

Dear Sir/Madam

RE: Application for Internship Program 2021

I would hereby like to apply for the 2021 internship program as offered by your organization

I am currently a third year BComp student at Belgium Campus and am very much interested in being provided the opportunity to work for your company.

Describing attributes: I am ambitious; a team player; and results driven, while being able to maintain a balance between work and play. I believe that if given the opportunity, that your company would equip me with the necessary experience and skill set to one day be a leader in the field of software engineering. In-turn, I undertake to be committed to learning and growing, to become a valuable and productive intern, and as such - optimizing my value and return to your organization.

As a current vice president of the SRC, I have had the opportunity to hone my skills in terms of time management, task co-ordination and discipline in fulfilling my responsibilities whilst maintaining a high academic standard. In 2018 and 2019, I attended the Port Elizabeth campus and was academically recognized as the top campus achiever in my respective years. I have since moved to the main Pretoria campus to further my exposure to the IT industry and further opportunities availed.

I have attached my CV for your perusal, should you require any further information; please do not hesitate in contacting me. I have my driver's license and own transport, so am able to avail myself for an interview at your convenience.

Faithfully,

Tanielle Pettitt
